$y = f(x)$. 2 Express x ou f in terms of Y . 3 Find the values of y where f is defined.

4 Eliminate x from the equation and that will make an equation in y only.

5 Write the equation in terms of y .

6 Solve the equation for y .

7 Check the solutions in the original equation.

8 Verify the solutions.

9 Write the solution set.

10 The solution set is $\{y\}$.

11 The solution set is $\{y\}$.

12 The solution set is $\{y\}$.
