<p&gt;&lt;/p&gt;&lt;p&gt;To fully exploit the constrained width, avoid loadin
g the neighbouring structures and straddle shared utilities running under the si
te, the 4, £ house was constructed using a lightweight steel frame on a piled sl
ab. The steelwork was prefabricated as a series of 4, £ portal frames that were
craned down the alley and site-welded together. Given that every inch in such a
narrow space 4, £ was valuable we chose to fully weld the connections and expres
s the frame internally, even utilising the depth of the 4, £ steels to maximise
the space.</p&gt;
<p&gt;Alongside the painted steel a simple palette of spruce plywood, douglas
fir joists, terrazzo and cork 4, £ flooring enriches the interior. Externally t
he timber framed walls are clad in handmade pewter glazed brick slips with a pat
ina 4, £ that reflects the changing light of the sky. Both the simply landscaped
and planted rear courtyard and the garden in 4, £ front of the house enhance th
e feeling of space in this small dwelling.</p&gt;
<p&gt;This self-build project had a long gestation, fitted 4, £ in around pro
fessional and family life. The design and construction were developed as time an
d money allowed so whilst planning 4, £ consent was given in January 2014 and th
e ground works commenced in the spring of 2024, the building was not 4, £ comple
ted until August 2024. We worked closely with friend and joiner Michael Tye to I
ead a small team of local 4, £ subcontractors and employed specialist fabricator
s for certain key packages as well as undertaking a fair amount of the work ours
elves.</p&gt;
